1. Achievements of the Project “Chinese Characters Repertoire” (中華字庫)

The Project has collected over 1 million characters. They are being recognized and 300 thousand fonts have been made for further processing.

The Project has picked up all representative characters and their explanations in Kanxi Zidian (康熙字典) and Hanyu Da Zidian (漢語大字典).

2. National Digital Compound Publishing System Project (國家數字複合出版系統工程)

The project started in 2014 and plans to end in 2018. It includes 6 technology platforms (such as collecting and editing management platform), 9 critical technologies (such as automatic typesetting technology) and 16 subprojects, and more than 50 pilot publishing agencies. The un-encoded characters found in this project will be examined for future submission to IRG.

End.
