Universal Multiple - Octet Coded Character Set UCS

ISO/IEC JTC1/SC2/WG2/IRG N2198

Date: 2017-05-05

Source:	China
Title:	Proposal on 3 China's UNCs for Chemical Terminology to URO+
Meeting:	IRG #48, Bundang, Gyeonggi-do, Republic of Korea
Status:	Member's submission
Actions required:	To be considered by IRG
Distribution:	IRG
Medium:	Electronic
Page:	12
Appendix:	Attributes (in an excel file)

1. Introduction

On 28th November 2016, the International Union of Pure and Applied Chemistry (IUPAC) approved the name and symbols for four elements: nihonium (Nh), moscovium (Mc), tennessine (Ts), and oganesson (Og), respectively for Elements 113, 115, 117, and 118.

The following names and symbols are officially assigned:

Nihonium and symbol Nh, for the Element 113,

Moscovium and symbol Mc, for the Element 115,

Tennessine and symbol Ts, for the Element 117,

Oganesson and symbol Og, for the Element 118.

On 15th February 2017, the China National Committee for Terms in Sciences and Technologies and the China National Language and Character Working Committee jointly organized the naming meeting of Elements 113, 115, 117, and 118. Through the discussion of chemists, physical scientists and linguists, the Chinese names of Elements 113, 115, 117, and 118 were definitely settled down. (Please see Table 1.)

Table 1 Chinese Names of Elements 113, 115, 117, and 118

Atomic Number	English Names	Chinese Names	Symbols	Pinyin	Traditional Forms
113	nihonium	软	Nh	nĭ	鉨
115	moscovium	镆	Mc	mò	鏌
117	tennessine	鿬	Ts	tián	和田
118	oganesson	鿫	Og	ào	鿫

No.2, Vol. 19 of the magazine China Terminology host by the China National Committee for

Terms in Sciences and Technologies showed the four Chinese names of new elements have approved to use as general purpose normalized Hanzi by the China National Language and Character Working Committee. (Please see Fig. 1.)

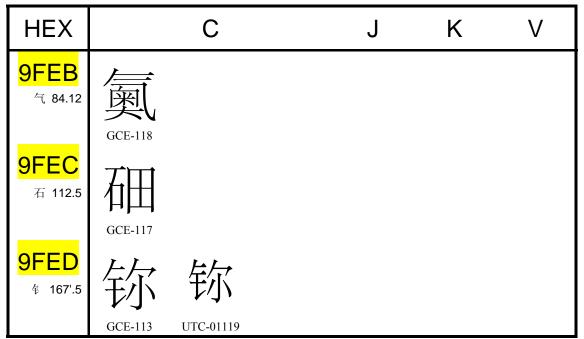

On 5th April 2017, the Chemical Terminology Translation Committee of the Academy for Educational Research in Taiwan area approved the new version of the List of Chemical Terms and Chemical Elements in their website. (Please see Fig. 2) This version has included the Chinese names of the four new elements.

By checking against the latest version of ISO/IEC 10646 and CJK Ext F (aka IRGN2156), we found 3 characters not encoded. One is in WS2015, which was submitted by UTC, other two are never proposed. Now China requests to IRG to process all the 3 characters as UNCs and include them in URO+. We plan to add a new Hanzi G source: GCE at this time.

Special note is that the traditional forms of GCE-113 are 鉨 (according to Fig. 1 and Fig. 53 in IRGN2091) and 鋼 (according to Fig. 3), but the only traditional form for the Chemistry Element is 鉨. UTC has submitted UTC-01119 in WS2015, which is the same with GCE-113, so we suggest IRG should make UTC-01119 be unified with GCE-113.

The new code chart we suggest like this:

Table 2 Part of the Code Chart

This China urgently-needed character submission consists of the following documents:

IRGN2198A: This document

IRGN2198B: Proposal summary form to accompany submissions

IRGN2198C: Appendix 1: An Excel spreadsheet with character attributes

IRGN2198D: Appendix 2: A zip archive of glyphs' bitmaps
IRGN2198E: Appendix 3: Four evidences of all the characters

IRGN2198F: Appendix 4: A font containing glyphs for all the characters

Chinese Characters Repertoire offered help to China National Committee for Terms in Sciences and Technologies for checking the characters and submitting this proposal.

2. Proposed Characters

Table 3 Three Proposed Characters as UNCs

G-Source Code	GCE-113	GCE-117	GCE-118	
Proposed	II. OPPD	II. OPP C	II. OPED	
Code Point	U+9FED	U+9FEC	U+9FEB	
PUA	U+E000	U+E001	U+E002

IDS	Ⅲ钅尔	□石田	□气奥	
103	U+2FF0,U+9485,U+5C14	U+2FF0,U+77F3,U+7530	U+2FF9,U+6C14,U+5965	
Radical	167'	112	84	
Radical Form	钅	石	气	
Strokes	5	5	12	
Total Strokes	10	10	16	
First Stroke	3	2	3	
KX Index	167'.5	112.5	84.12	
Putonghua Pronunciation	nĭ,xĭ,niè	tián	ào	
Cantonese Pronunciation	nei5,saai2,nip6	tin4	ou3	
T/S	1	0	0	
Simplified Form	SC	N/A	N/A	
Traditional Form	鉨 & 鑈	N/A	N/A	
Code Point for Traditional Form	U+9268 & U+9448	N/A	N/A	

3. Unicode Properties

```
9FEB;CJK UNIFIED IDEOGRAPH-9FEB;Lo;0;L;;;;N;;;;;
9FEC;CJK UNIFIED IDEOGRAPH-9FEC;Lo;0;L;;;;;N;;;;;
9FED;CJK UNIFIED IDEOGRAPH-9FED;Lo;0;L;;;;;N;;;;
```

Other properties are the same as for other CJK Unified Ideographs.

4. The New Hanzi G Source

GCE Chemistry Elements (化学元素中文用字)

The numbers behind "GCE-" mean the atomic number.

5. Evidences

Fig. 1 全国科学技术名词审定委员会 (China National Committee for Terms in Sciences and Technologies): 《全国科学技术名词审定委员会公布 113 号、115 号、117 号、118 号元素中文名称》(China National Committee for Terms in Sciences and Technologies Published the Chinese Names of Elements 113, 115, 117, 118), 《中国科技术语》(China Terminology), 2017.04., No.2, Vol. 19, ISSN 1673-8578 CN 11-5554/N, P. 25

全国科学技术名词审定委员会 公布 113 号、115 号、117 号、118 号元素的中文名称

全国科学技术名词审定委员会根据国际纯粹与应用化学联合会(IUPAC)2016年11月30日对113号、115号、117号、118号元素正式公布的英文名称,在广泛征求有关专家意见的基础上,提出了113号、115号、117号、118号元素的中文定名草案。113号、115号、117号、118号元素使用的中文汉字"铢""镆""佃""氖"已征得国家语言文字工作委员会的同意,并纳入国家规范用字。现经全国科学技术名词审定委员会批准予以公布使用。

原子序数	英文名称	中文名称	符号	汉语拼音
113	nihonium	专尔	Nh	nĭ
115	moscovium	镆	Mc	mò
117	tennessine	福田	Ts	tián
118	oganesson	鿫	Og	ὰο

PROPOSAL SUMMARY FORM TO ACCOMPANY SUBMISSIONS FOR ADDITION OF CJK UNIFIED IDEOGRAPHS TO THE REPERTOIRE OF ISO/IEC 10646

Submitters are reminded to:

1.Fill in all the sections below.

2. Read the Principles and Procedures Document (P & P) available at

 $\underline{http://appsrv.cse.cuhk.edu.hk/\!\!\sim\!\!irg/irg/irg45/IRGN2092PnPv8.pdf}$

for guidelines and details before filling in this form.

3. Use the latest Form from

 $\underline{http://appsrv.cse.cuhk.edu.hk/\!\!\sim\!\!irg/irg/irg/45/IRGN2092PnP_BlankDataFile.xls}$

 $\textbf{See also } \underline{\textbf{http://appsrv.cse.cuhk.edu.hk/}} \underline{\textbf{for the latest } \textit{Unifiable Component Variations.}} \\$

A. Administrative

1. IRG Project Code:	IRGN2198		
2. Title:	China's Proposal on 3 China's UNCs for Chemical Terminology to IRG #48		
3. Submitter's Region/Country	y Name:	China	
4. Submitter Type (National F	Body/Individual Contribution):	Membe	er body
5. Submission Date:		2017-	05-05
6. Requested Ideograph Type	(Unified or Compatibility Ideographs)	Unified Id	leographs
If Compatibility, does	the submitter have the intention to register the	m as IVS (See UTS #37)	No
with the IRG's approva	al? (Registration fee will not be charged if author	rized by the IRG.)	
7. Proposal Type (Normal Pro	pposal or Urgently Needed)	Urgently N	leeded
8. Choose one of the followin	g:		
This is a complete prope	osal		Yes
(or) More information w	vill be provided later.		
B. Technical – Ge	neral		
1. Number of ideographs in	the proposal:		3
2. Glyph format of the prop	osed ideographs: (128x128 Bitmap files or True	Type font file)	Both
If Bitmap files, are th	eir file names the same as their source reference	es?	Yes
If TrueType font file.	are all the proposed glyphs put into BMP PUA	area?	Yes
If TrueType font file	, are data for source references vs. character cod-	es provided?	Yes
3. Source references:			
Do all the propo	sed ideographs have a unique, proper	source reference (member	Yes
body/international co	nsortium abbreviation followed by no more than	n 9 alphanumeric characters)?	
4. Evidence:			
a. Do all the propose	d ideographs have a separate evidence documen	nt which contains at least one	Yes
scanned image of prin	nted materials (preferably dictionaries)?		
b. Do all the printed third party (ISBN nur	materials used for evidence provide enough in mbers, etc.)?	formation to track them by a	Yes
5. Attribute Data Format: (I	Excel file or CSV text)		Excel

C. Technical - Checklist

Und	lerstanding of the Unification Principles	
1.	Has the submitter read ISO/IEC 10646 Annex S and does the submitter understand the unification	Yes
1.	principles?	163
2.	Has the submitter read the "Unifiable Component Variations" (contact the IRG technical editor	Yes
۷.	through the IRG Rapporteur for the latest version) and does the submitter understand the unifiable	163
	variation examples?	
3.	Has the submitter read the IRG PnP document and does the submitter understand the 5% Rule?	Yes
	aracter-Glyph Duplication (http://www.itscj.ipsj.or.jp/sc2/open/pow.htm contains all the	
	olished ones and those under ballot)	
4.	Has the submitter checked that the proposed ideographs are <i>not unifiable</i> with any of the unified or	Yes
	compatibility ideographs of the latest version of ISO/IEC 10646?	
	If the checking has been done against an earlier version of ISO/IEC 10646, please specify the	ISO/IEC
		10646:2014(E)
5.	Has the submitter checked that the proposed ideographs are <i>not unifiable</i> with any of the ideographs in	Yes
	the amendments, if any, of the latest version of ISO/IEC 10646?	
	If yes, which amendment(s) has the submitter checked?	
6.	Has the submitter checked that the proposed ideographs are <i>not unifiable</i> with any of the ideographs in	Yes
	the proposed amendments, if any, of ISO/IEC 10646?	
	If yes, which draft amendment(s) has the submitter checked?	
7.	Has the submitter checked that the proposed ideographs are <i>not unifiable</i> with any of the ideographs in	Yes
	the current working M-set and D-set of the IRG? (Contact IRG chief editor and technical editor	
	through the IRG Rapporteur for the newest list)	W62015
0	If yes, which document(s) has the submitter checked?	WS2015
8.	Has the submitter checked that the proposed ideographs are <i>not unifiable</i> with any of the over-unified	Yes
	or mis-unified ideographs in ISO/IEC 10646? (See Annex E of the IRG PnP document).	
9.	Has the submitter checked whether the proposed ideographs have any <i>similar ideographs</i> in the	Yes
	current standardized or working sets mentioned above?	
10.	Has the submitter checked whether the proposed ideographs have any <i>variant ideographs</i> in the	Yes
	current standardized or working sets mentioned above?	
	ribute Data	
	Do all the proposed ideographs have attribute data such as the Kangxi radical code and stroke count?	Yes
12.	Are there any simplified ideographs (ideographs that are based on the policy described in 簡化字總表) among the proposed ideographs?	Yes
	If yes, does the proposal include proper simplified/traditional indication flag for each proposed	Yes
	ideograph in the attribute data?	
13.	Do all the proposed ideographs have the document page number of evidence documents in the attribute	Yes
	data?	
14.	Do all the proposed ideographs have the proper Ideographic Description Sequence (IDS) in the	Yes
	attribute data?	
	If no, how many proposed ideographs do not have the IDS?	
15.	If the answer to question 9 or 10 is yes, do the attribute data include any information on similar/variant	Yes
	ideographs for the proposed ideographs?	
16.	Do all the proposed ideographs contains the total stroke count(kTotalStrokes) ¹ ?	Yes

¹ The IRG understands that kTotalStrokes can be ambiguous and subject to different interpretations. The IRG takes no responsibility to check the correctness of the submitted attribute data.
