Feedback to Henry Chan's Review of IRG WS2015 v4.0 (IRGN2223): High Priority Unconsolidated Comments from Henry Chan's Review

Source: Wang Yifan

This document excerpts independent or additional comments found in Henry Chan's review, which are not included in the Consolidated Comments, but refer to problems that likely affect coherence of WS2015 collection and/or stability of the existing standard, hence might require attention of IRG experts.

The document contains:

- G-source, previously unified components   23 characters
- G-source, undiscussed unifiable glyphs   27 characters
- U-source (UK), undiscussed unifiable glyphs   1 character
- U-source (SAT), previously unified components   1 character
- U-source (SAT), undiscussed unifiable glyphs   2 characters

The list begins from the next page.

If this glyph is encoded, it will certainly hamper the encoding of the derived simplified form of � U+3C47 (⿰畱欠). It will very likely be unified with this glyph and China will then need to submit a glyph change request.
