

## SAT's Feedback to IRG#50 Discussion Record on WS2015 (IRGN2291 Appendix)

We have found the following discrepancies between the official discussion record and our recordings. Entries are sorted according to the order in the official D/R. We do not claim our accuracy over the official D/R, but would kindly ask experts to reconfirm the discussion results.

(Note: Our tag name **live** means retained in M-set, and **withdrawn** either of withdrawal, horizontal extension, IVS, or unification.)
