Title:	Comment on IRG N2298 & L2/18-066 (Proposed kIICore Changes & Additions)
Status:	Individual contribution
Action required:	To be considered by the IRG
Pages:	3

Remove the “K” region tag from the following 138 IICore characters (all of these are outside KS X 1001). Korea cannot figure out any details about them.

According to Ken Lunde, the people who compiled the “K” portion of IICore either passed away or are no longer participating in the Korean NB, and there is no document nor report explaining how the “K” portion of IICore was prepared. (See <https://blogs.adobe.com/CCJKType/2018/02/exploring-iicore-part-1.html>)
