

Universal Multiple-Octet Coded Character Set  
UCS

ISO/IEC JTC1/SC2/IRG N2337 and IRGN2338  
Date: 2019-5-9

Doc. Type:	Member body contribution
Title:	TCA's feedback to IRG N2337 and IRGN2338
Source:	TCA
Status:	Input to IRG meeting 52
Action:	For consideration by JTC1/SC2/WG2/IRG
Distribution:	IRG Members and Ideographic Experts
No. of pages:	2
Appendixes	None
Medium:	Electronic

● **Feedback to IRG N2337:**

For the IRG N2337, the relative T-source ideographs are shown in the following table. The glyph of T3-233C is same as the Zhuang character mentioned in IRG N2337. Based on the comments in IRG N2337, TCA would like to disunify U+2F83B from U+05406.

T-code/UCS-code	USC font	全字庫 font
T3-233C/ U+2F83B	<p>2F83B □ 30.3</p> <p>T3-233C H-9AC8 ≡ 5406 𠮩 ~ 5406 FE00</p>	<p>𠮩 𠮩 𠮩 明體 楷體 宋體</p>
T1-475C/ U+5406	<p>5406 □ 30.3</p> <p>G0-5F3A H1-465B T1-475C K2-2637</p>	<p>𠮩 𠮩 𠮩 明體 楷體 宋體</p>

● **Feedback to IRG N2338:**

For the IRG N2338, there are four groups of relative T-source glyphs shown in the following table. For those four groups of T-source glyphs, TCA's feedback are described as follows:

For the group 1, TCA would like to disunify the T-source glyph (T4-216A) from G-source glyph (G0-5F34) due to that they are non-cognate as mentioned in IRG N2338.

For the group 2, TCA would like to disunify U+2F878 from U+5C6E due to that they are non-cognate as mentioned in IRG N2338.

For the group3, TCA's philologists recognize that T6-3857 is a variant of T6-4A3F, and T6-4A3F rather than T6-3857 is more suitable to be encoded in CJK unification area.

Therefore, TCA would like to replace the T-source glyph of U+5C6E with T6-4A3F, and replace the T-source glyph of U+238A7 with T6-3857. That means to swap the T-source glyphs in U+5C6E and in U+238A7.

For the group 4, TCA would like to disunify U+2FA02 from U+98E2 due to that they are non-cognate as mentioned in IRG N2338.
