- Unifications and dis-unifications
- Radicals
- Evidences

All decisions were recorded on line in real time. The IRG Chief Editor is instructed to check other issues such as Stroke Counts, Total Strokes, First Stokes, and prepare updated attributes data for generating IRGN2385 CJK WS2017v4.0. 19 UCVs and 2 NUCVs were added and will be reflected in IRGN2387 and IRGN2388. A photo is appended to this document for memorandum.

Besides, the editors accepted comments in UK and Vietnam activity reports and decided:

(1) Modify 01028 (UK-10931) to 尸查 as requested in IRGN2358 UK activity report (Item 3).

(2) Keep 00237(V-F004F) as a separate character, remove 01080 (V-F0C54) and 01024 (V-F13BB).

The editors also agreed to add UK-01969 卅项 to CJK\_G thus it should be removed from WS2017.

The submitters are encouraged to implement their unified characters (in WS2017) by means of IVSes.
