Meeting: IRG#53 @ Shenzhen, China

Title: Japan Activity Report (October 2019)

Keywords: (none)

Status: For your information

Short Description: This paper summarizes activities of Japanese National Body

Proposed Conclusion / Requested Action: for review

Arguments / Text of Contribution: See attachments.

## Japan Activity Report (October 2019)

### 1. Attendance at the international meetings

Four experts attended the WG2 #68 @ Redmond in June.

Three experts attended the SC2 #24 @ Redmond in June.

### 2. JIS X0221

The project to revise JIS X0221 standard which is corresponding to ISO/IEC 10646 standard is in progress. The objective of this is to follow the latest version of ISO/IEC 10646, which are the fifth edition and its two amendments. The proposed draft will be completed by the end of this year.

By the way, Japan will gladly host IRG meeting (spring-summer) in 2021. If it is scheduled in May, we prefer to hold the meeting late May. Because we have long holiday in early May. Meeting place will be decided later.
