

# SAT Feedback to Macao's UNC and Horizontal Extension Submissions (IRGN2430)

Date: 2020-06-15

We have reviewed IRGN2430 documents, and provide following comments:

- (1) Among Urgently Needed Characters, we suggest encoding MC-00135 as an IVS of 謙 (U+8B67) according to the latest UCV #337. All the disunified examples are up until Extension B, which predates the UCV. It should be understood that such glyphs are unifiable as of today.
- (2) While it may be obvious, 16 non-CJK characters (MD-00C2 to MD-00F5) in the horizontal extension set are out of scope of horizontal extension.

Feedback to the new IVD collection would be given until the end of the public review period if any.
