

Universal Multiple-Octet Coded Character Set  
International Organization for Standardization

ISO/IEC JTC1/SC2/WG2 N2505R

Title: Vietnam Activity Report for IRG # 57

Source: VNPF

Status: National body contribution

Action: For consideration by JTC1/SC2/WG2/IRG

Date: 13 September 2021

Here is a summary of Vietnam's activities

### **1. Submitted IRGN2490R**

This document describes the changes to the source references of V-Source ideographs. The changes are already reflected in Extension-H and will be used to identify V-Source characters in Unicode v.14.

### **2. Review of IRGN2475 Extension H**

We are continuing review of Extension H. We provided some feedback regarding V-Source character code changes.

### **3. WS2021**

We reviewed the working sets submitted by all members and provided feedback and responses via the online tool.

### **4. Nom Na Tong font**

The Vietnamese reference font, NomNaTong-regular.ttf, is now available in a git-hub project at <https://github.com/nomfoundation/font>. We continue to add glyphs and fix errors as we find them. Version 4.6 was provided to the IRG for code charts and the current version is 4.8. Proposals for a small number of glyph changes will be submitted to the IRG in the coming months.

### **5. Addition of Dr. Trần Trọng Dương to our advisory group.**

Dr. Dương (陳仲洋), a scholar and member of the Institute of Hán-Nôm Studies in Hanoi, has agreed to participate in our encoding effort in an advisory role. He does not plan to attend IRG meetings at this time.
