## 1. U+FAB0 練

According to the 金文編, 練 is the same as 纒, see Figure 1.

If U+FAB0 is to be disunified, does J0-4E7D in U+7DF4 agree to be encoded with U+FAB0? If not, what should we do?

## 2. U+FAD1

From IRG N2510's Figure 5&6, we can't confirm whether the character in IRG N2510's Figure 5 is a variant or an incorrect character. TCA suggest to provide more evidences to make a decision, and then confirm whether we can disunify.

 時珍曰：牛蒡古人種子，以肥壤栽之。剪苗洵淘爲蔬，取根煮曝爲脯，云甚益人，今人亦罕食之。三月生苗，起莖高者三四尺。四月開花成叢，淡紫色。結實如楓椹而小，萼上細刺百十攢簇之，一椹有子數十顆。其根大者如臂，長者近尺，其色灰黧。七月采子，十月采根。
