

Universal Multiple-Octet Coded Character Set  
International Organization for Standardization

ISO/IEC JTC1/SC2/WG2 N2505R

Title: IRGN2535:Vietnam Activity Report for IRG # 58

Source: Vietnam

Status: National body contribution

Action: For consideration by JTC1/SC2/WG2/IRG

Date: 11 March 2022

Here is a summary of Vietnam's activities since the last IRG.

### 1. Review of IRG Working Set 2021

Reviewed assigned range of characters in the Online Review Tool. Responded to comments.

### 2. Response to feedback on Extension H PDAM

Based on review comments by the Japanese national body, we made changes to a small set of characters and submitted the updated NomNaTong-regular.ttf, v4.601 to Michel Suignard.

The specific changes are:

char	V-Source	old	new
拏	VN-F1E36	拏 拏	拏 拏
𠂇	VN-F085B	𠂇 𠂇	𠂇 𠂇
𠂈	VN-F1B1F	𠂈 𠂈	𠂈 𠂈
𠂉	VN-F1B17	𠂉 𠂉	𠂉 𠂉
𠂊	VN-F1B10	𠂊 𠂊	𠂊 𠂊
𠂋	VN-F1B19	𠂋 𠂋	𠂋 𠂋

### 3. Glyph outline issues in the encoded character range of NomNaTong-regular.ttf

A number of problems with glyph outlines, including dropouts and filling in of spaces, have been identified in the font. This includes the 3 mentioned in IRG N2541. Some of these go back a number of versions before version 4.600 submitted with working set 2021. Unfortunately, some of these issues crept into the code charts of Unicode 13.0. Few or none of the affected glyphs have explicitly changed since extension C. We suspect that the problem is due to design flaws in the original glyphs that surfaced as we migrated the font through new toolsets. We fixed about 160 problems and resubmitted as v4.602 to Michel.

### 4. Response to IRGN2509

We discussed and drafted a response to the proposal to disunify U+5F50 / V1-5454. Currently pending submission.
