

Doc Type: ISO/IEC JTC1/SC2/WG2/IRG  
Title: IRGN2553 Change to V-Source Glyph for U+2143F  
Source: Vietnam  
Status: National Body Proposal  
Authors: Lee Collins  
Action: For consideration by the IRG  
Date: 2022-04-8

There are two Vietnamese source ideographs with identical shape but different source references for two different CJK unified ideographs, U+58B6 and U+2143F:

VN-058B6 at U+58B6 is 𡗗土達; G and H glyphs are also 𡗗土達

VN-058B6 𡗗

VN-2143F at U+2143F is also 𡗗土達; but G and H glyphs are 𡗗土達 (one stroke less)

VN-2143F 𡗗

We propose to modify the V source glyph for U+2143F to match the G and H glyphs for U+2143F and to distinguish it from the V glyph for U+58B6.

VN-2143F 𡗗
