| Title: | Response to IRGN2575 |
| Status: | Member Submission |

Since the characters listed in IRGN2575 are not a part of MSCS and they are supported in system fonts, MSARG does not consider adding these proposed glyphs to M column of the ISO/IEC 10646 Code Charts.

In principle, MSCS is a supplement to Big-5 (Eten) and HKSCS. However, MSARG only maintains glyphs for the characters in MSCS. In other words, MSARG does not maintain the glyphs of the latent characters mentioned in IRGN2575. For the characters in Big-5 and HKSCS, MSARG users are free to use fonts supplied by font vendors in their systems.

At this stage, the Working Group of MSARG focuses on the encoding of MSCS and cross-department data interchange rather than the normalization of glyphs.
