

Universal Multiple-Octet Coded Character Set
International Organization for Standardization

ISO/IEC JTC1/SC2/WG2 IRGN2631

Title: Vietnam Activity Report for IRG # 61
Source: Vietnam
Status: National body contribution
Action: For consideration by JTC1/SC2/WG2/IRG
Date: 11 October 2023

Here is a summary of Vietnam's activities

1. Review of Working Set 2021

We continued to review and comment on a the working set, and responded to the comments of other reviewers via the Online Review Tool.

2. NomNaTong font update, v4.612

On 5 April 2023, we provided Henry with an updated version v4.612 of the font that incorporates glyph changes suggested during the review process to achieve a design consistent with other V-Source characters. The glyphs changed were:

諷	VN-F04FB	𠄎𠄎誤
滌	VN-F0732	𠄎𠄎洪令
嘯	VN-F16E2	𠄎𠄎口萌
踈	VN-F1629	𠄎𠄎𠄎𠄎𠄎
翮	VN-F19DF	𠄎𠄎江羽
霽	VN-F1BF3	𠄎𠄎雨別
綑	VN-F0B89	𠄎𠄎絲別
𠄎	VN-F1CCE	𠄎𠄎望林
𠄎	VN-F1916	𠄎𠄎日班
𠄎	VN-F1B2D	𠄎𠄎草爭

Note, the glyph changes do not require data changes. In particular, VN-F1B2D was originally submitted with SC for U+722D 爭, not U+4E89 争.

3. NomNaTong font update, v4.613

Several additional glyph changes have been proposed during the recent round of review. We believe that one has merit and have updated the font to include it. The change replaces the component 女 with 𠄎.

𪗇 VN-F170F 𪗇𪗇𪗇

For consistency, we would also propose changing the glyph of the encoded V-Source character, U+21128:

𪗇 21128 𪗇𪗇𪗇

Since the stroke counts are already based on 𪗇, no data changes should be required.
